

Property owner consent form

Installing fibre into your apartment office building or unit.

Enable has received a request to install our fibre broadband into a property you own (or for which you are the authorised agent of the property owner).

Before we can connect customers in this building or complex to our fibre network, we need consent from all owners of the building or complex (or the owners' authorised agents). Please review this document, complete the last page and return to Enable.

Installing fibre broadband at your property

In most cases, we install fibre broadband from the footpath into a home or building via one or a combination of the following methods:

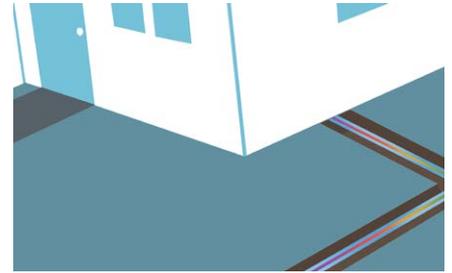

1 Fence Line

Surface mounting the fibre cable to a suitable surface, such as the railing on a fence.

2 Slot Cutting

Creating a very narrow cut (10-20mm) in a hard surface (such as concrete) usually following an existing joint, installing the fibre cable and reinstating.

3 Trenching

Opening a trench in the ground in order to bury the fibre cable and reinstating the surface once the cable is installed.

Digging may be required for some of the installation methods. We aim to minimise disruption and will reinstate any surface we disturb on a “like for like” basis, for example asphalt where there is asphalt or grass seed where there is grass. We cannot guarantee to match the surface finish or colour and our reinstatement is limited to the surface we have disturbed.

We may be able to use existing ducting as part of the installation if:

- The property has unused telecommunication duct available, and you can demonstrate ownership of it.
- Enable has installed red duct on the property in the past.

Please note that by providing consent you are also consenting any additional work that may be required in the future by Enable’s contractors to connect more customers at the property.

Enable’s commitment to you

We are committed to ensuring our network installation work has minimal impact on your property.

- All work will be carried out to a professional standard in accordance with legal requirements and industry standards.
- We will use the installation method that has the least impact on your property.
- Our contractors will conduct themselves professionally while working on your property.
- We will always try to give you reasonable advance notice, including a description of the work and the identity of the contractor who will be sent to carry out the work.
- Our contractors will endeavour to minimise disruptions and will leave your property in a neat and tidy state once the work is complete.

Address of rental property or properties (“Property”) that you are providing consent for:

Order # (if known) _____

I give my consent for Enable Networks Limited and its approved contractors to access the Property and any shared accessway to install, inspect, repair, maintain and remove fibre broadband and related network equipment. This consent will continue while Enable’s infrastructure and/or equipment remains at the Property and any shared accessway.

I acknowledge that Enable has continuing ownership of the network and equipment it installs (which, for the avoidance of doubt, includes the common distribution point, break out boxes, optical network terminals and units, and their power cables) and agree that it must not be worked on or interfered with, without Enable’s prior written consent. If another entity takes over responsibility for installing or maintaining the network, then my consent and its terms will apply to that new entity.

Any personal information collected in connection with this Consent will be held by Enable and its related companies for consenting purposes (for this property and to contact you in relation to any other property you may own) and in accordance with the Privacy Act 2020. You have the right to access any personal information about you held by Enable, and to request that a correction be made to that information. The Privacy Act 2020 precludes Enable advising any details as to which other parties have or have not provided their consent if relevant.
